LETTER OF RECOMMENDATION

I take immense pride in introducing **Mr Shiramshetty Sri Ganesh**, who worked with our organization as a web developer, graphic designer and content maker. Hence, I consider myself to judge his aptitude and calibre.

He created websites and logos for our key events and fests that brought us massive success. **TRISHNA 2021** is an event conducted by our college where students from multitudinous colleges, schools and diverse academic standards can take the privilege to participate in several cultural and educational activities. Sri Ganesh managed whole websites, youtube channels and made all our events successful.

The certificates Sri Ganesh designed for **TRISHNA 2021** - an Annual Day Event, **Inventron** - a 36 hour hackathon-2019, **Artificial Intelligence for Agriculture** - a 36-hour hackathon were unique and themed according to the motive that shows his creativity. Sri Ganesh was also responsible for event organization, photography and advertising the events that made him an allrounder. His interest in Computer Science makes him an ideal student for higher education in this related field.

He is an exceptional professional with an extraordinary working ability which helps him understand even the intricate details very comfortably. His strong points include good communication skills, completing the given work before the deadlines, being optimistic and being an enthusiastic person.

Before I conclude, I would like to say **Shiramshetty Sri Ganesh** is an excellent choice for a research assistant. I have been looking at his dedication and zest towards the projects on which he worked. I believe he will always work towards the success of the project. Thus, I strongly recommend him for masters in your university. I request you to make him available for the required financial aid.

(Dr. K. Srinivas Rao)
